Ecological Gesture Awareness

The entire Georges Blanc group is involved in preserving the environment through good practices. Help us continue our actions by adopting simple actions.

Here are some ideas to help save energy.
You can :

- Turn off the electricity when you leave the room.
- When you stay here for several days, place only the towels on the floor that you wish to be changed.
Other towels will not be renewed.
- Always turn off the television, computer, etc. when you no longer use them. In standby mode, a device can still consume up to 30% of energy.
- Close the shutters and curtains every evening in winter.
This avoids significant heat loss.
- Turn off the tap while brushing your teeth and shaving.
15 liters of water escape from the tap in one minute.
- Take a short shower rather than a bath.
A bath uses as much hot water as four showers.
- Sort your waste.
Recycling bins are at your disposal.
- Use our bicycle parking spaces and charging stations for your electric vehicles.

*"The earth our life, the waste our enemies.
Let's keep our beloved planet healthy"*

Our CSR commitments

The Georges Blanc company has chosen to engage in a social approach for many years and eco-responsible.

Discover our commitments and actions to best welcome future generations.

Corporate social responsibility

A company made up of men and women, the company has chosen to gradually engage in a social and eco-responsible approach for many years.

Discover our commitments and actions to best welcome future generations.

Bed and bath linen

When you stay with us, you have the option of not changing your sheets and towels daily.

This action is part of our desire to protect the environment and allows significant savings in water and energy.

Sym Biologic cosmetic brand in the Spa Georges Blanc

Sym Biologic is a leading cosmetics brand offering top-of-the-range products that are 100% natural and sourced from the company's own plantations.

Waste management

Our goal is to reduce our waste production as much as possible.

Moreover, for a long time we have been treating and recycling organic waste in our compost to improve our gardens.

For the remaining waste, we work with an external company which is permanently on our site in order to improve the management of sorting and their recovery.

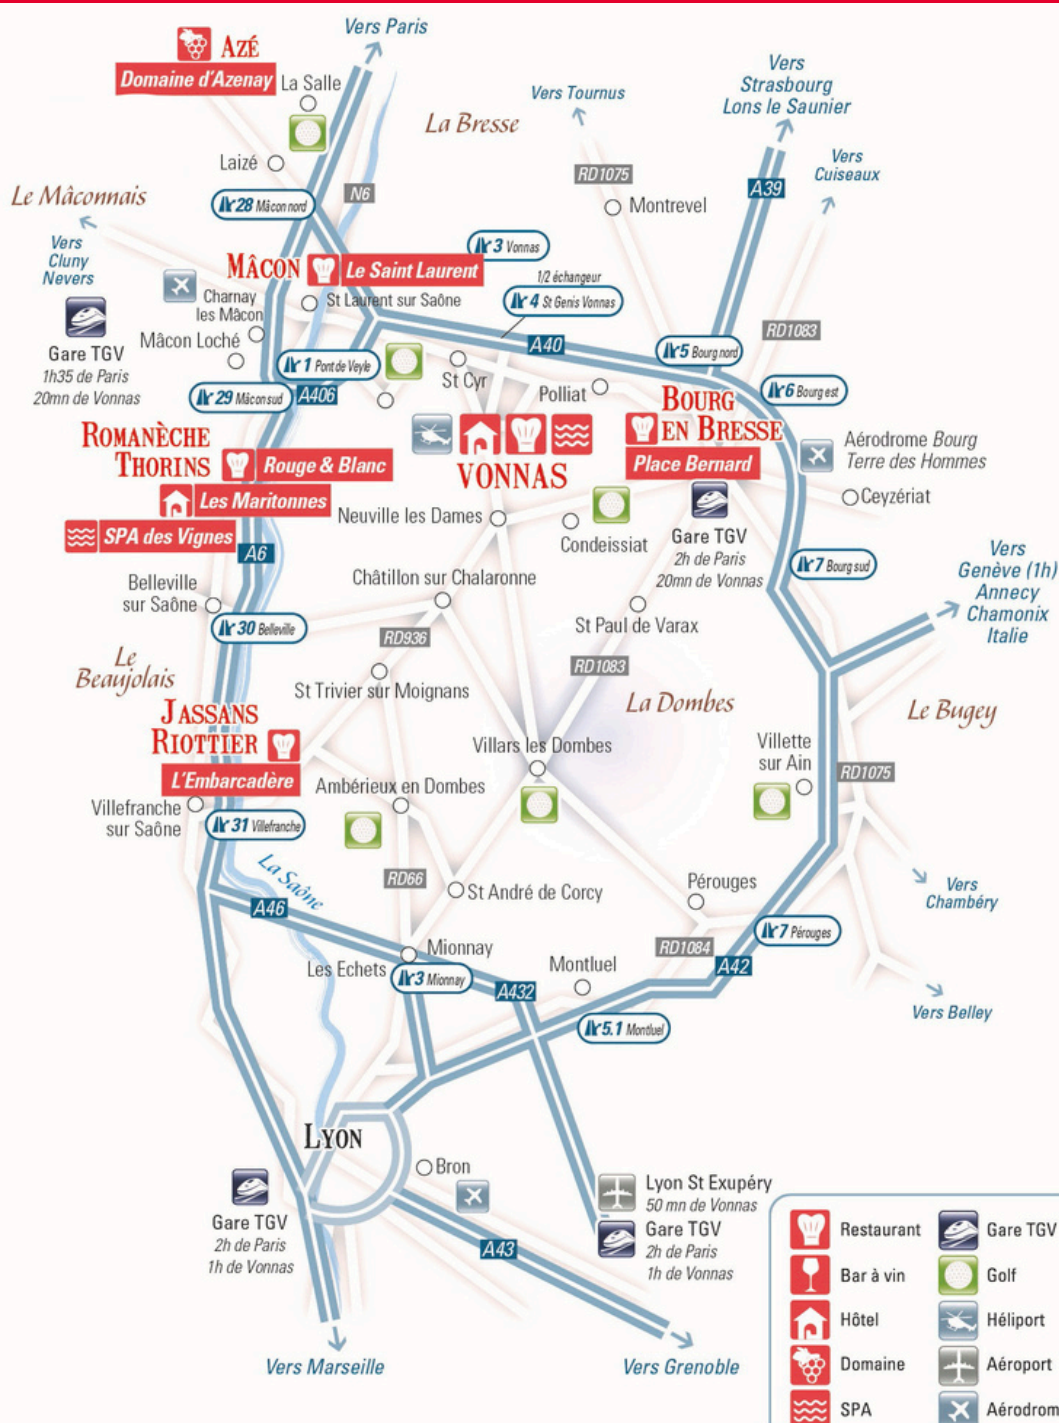

Charging stations

Our establishments are equipped with charging stations for electric vehicles: Porsche, Tesla and universal.

Balance carbon

Since 2022, we have been carrying out a carbon assessment to assess our situation. It was thus possible to determine the sources that emit the most greenhouse gases and to implement methods to reduce these emissions.
